

# ePay

## Replace your Paper-based Accounts Receivable Processes

### Enliven Software's ePay Solution

Enliven's ePay is a comprehensive solution enabling midsize businesses to automate their accounts receivable processes

#### Now, you can...

- Allow customers to pay directly via web, email or phone with check, credit card, PayPal and more.
- Avoid interrupting the customer's user experience on your website with a customized online payment gateway incorporating your organization's brand.
- Show that your business is tech savvy and cares about making purchasing easy for customers.
- ePay works with your existing accounting system

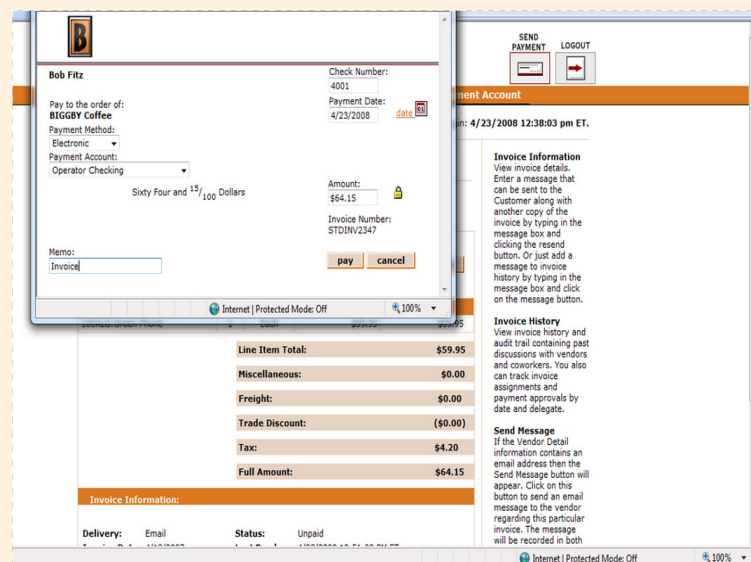

#### Remove pain and reduce costs from the receivables process

- Minimize receiving of paper checks
- Reduce the hassle of running to the bank to deposit checks
- Save even more money streamlining the way your company gets paid
- Maximize cash flow and get paid faster
- Make paying bills easier for your customers

#### With ePay, you can...

With Enliven's ePay, your customers will have access to a secure, online payment gateway through your website where they can:

- Pay with confidence by accessing their password-protected account
- View payment history
- See when your organization has sent a payment reminder
- Initiate or respond to an inquiry regarding the account

## Here's How We Can Help...

### Increase customer satisfaction

- Allow customers to choose the method of payment: ACH, credit card, PayPal, Google Checkout and Amazon
- Create an instant, secure payment history that is available 24/7
- Record any questions and discussions regarding the invoice on the secure site
- Allow your customers to eliminate paper when they deal with you

### Streamline your receivables process

- Export reports directly to your accounting system
- Automatically detect fraud
- Payments are directly deposited into your organization's bank account, increasing cashflow
- Know when your customers plan to pay with scheduled payment notices

### Benefits

- Provide customers with a variety of secure payment options with a viewable payment history
- Receive payments faster for better cashflow
- Customized payment gateway incorporates your organization's brand to preserve a seamless user experience on your website
- Eliminate manually handling, entering and filing paper checks
- Save employee time with automatic fraud detection and direct deposit
- Integrate reports with your accounting system

### Automated accounts receivable

Streamline the receipt process with any payment method.

Businesses want to retain customers by offering exceptional service, but receiving paper checks, processing them and filing them away takes valuable employee time away from the customer. Free your employees to better serve customers by allowing ePay to handle your receivables.

ePay also allows your customers the option to go paperless, a feature that is in demand as companies strive to be both efficient and eco-oriented.

Allow ePay to increase your cashflow by automatically detecting incoming payments for fraud prior to directly depositing the funds into your company's bank account. ePay will generate a payment history, integrate the payment with your accounting system and send a receipt notice to your customer. So, money flows more freely and your employees have more time to spend pleasing your clients instead of running to the bank or post office.

### Your customers will love it.

Don't risk losing sales to competitors because you cannot accept credit, ACH or PayPal payments. Customers want to pay with their chosen method, and with ePay, your company can cater to more customers by accepting a convenient array of payment types.
